25X1

1. In the spring of 1951, work on the construction of a large dwelling for air force officers was started on the south side of Ul. Zeromskiego in Warsaw. At the same time, three blocks of buildings were under construction for KBW officers north of this street. The building for the air force officers was almost completed in November 1951. On the construction sketches the project was designated M.P.B. 303 Bielany. The building had three stories and was about 100 meters long. Most of the ground floor was taken up by shops.<sup>1</sup>
2. A dwelling about 80 meters long, also scheduled to be occupied by Polish Air Force soldiers, was under construction about 250 meters southeast of the above mentioned officers' billets. The building had only three stories although it was originally planned to build it as a four-story structure. However, this was not allowed because the building, allegedly, was in an aircraft approach lane.
3. Air force personnel were seen proceeding from Ul. Zeromskiego to an airfield 2 or 3 km to the southwest.<sup>2</sup>

25X1  Comment. An airfield which is apparently occupied by a Polish pilot school is located at Bielany (N 53/P 99).25X1  Comment. Bonerowo airfield is located 2 or 3 km southwest of Ul. Zeromskiego. Its northeast-southwest approach lane crosses the dwelling for Soviet Air Force members mentioned in paragraph 2. For location sketch of air force installations, see Annex.
